

NIDHIN V NINAN

Software Developer | Full Stack Developer

I am a Software Engineer with a strong track record of delivering client solutions at an early-stage startup. I actively contribute to open source and enjoy building scalable systems with clean, maintainable code.

PROFESSIONAL EXPERIENCE

LOGICCRAFT SOFTWARE SOLUTIONS | SDE INTERN

June 2024 – Jan 2026 | Alappuzha, Kerala, India

- Developed highly responsive web and mobile applications across 10+ client projects, improving UI performance and delivering tailored software enhancements based on direct client requirements.
- Successfully translated complex UI/UX designs and **Figma** blueprints into high-quality, pixel-perfect, and interactive frontend interfaces.
- Connected client-side components with backend REST APIs and WebSockets to enable real-time data synchronization and seamless system exchange.
- **WellNest Healthcare Platform** | FLUTTER · BLOC · SOCKET.IO · REST API
Designed and developed a comprehensive healthcare ecosystem comprising dual cross-platform mobile apps (Patient and Doctor applications) using **Flutter** and **BLoC/Cubit** state management. Implemented secure token-based authentication, an interactive slots-booking calendar interface, and real-time patient-doctor communication channels via REST APIs.

PROJECTS

CATERCRAFT | FLUTTER · REACT · NODE.JS · MONGODB · RABBITMQ · REDIS · AWS S3 · EC2 · SOCKET.IO · FCM · RAZORPAY · DOCKER · GITHUB ACTIONS · JEST | [[Github](#) →]

- Architected a full-stack ecosystem with a Flutter mobile app and dual React web portals, leveraging RabbitMQ, Socket.io, and FCM for real-time order tracking and async push alerts.
- Built a secure AWS S3 media pipeline and Razorpay payment gateway; implemented Jest test suites covering critical backend API endpoints to guarantee production stability.

QFLOW | FLUTTER · REACT · NODE.JS · EXPRESS · MONGODB · RABBITMQ · REDIS · AWS EC2 · AWS S3 · FCM · DOCKER · GITHUB ACTIONS · JEST | [[Github](#) →]

- Developed a real-time hospital queue dashboard using Node.js, Express, and Socket.io, decreasing patient waiting area congestion via live token status tracking.
- Incorporated RabbitMQ for background event dispatching and automated SMS alerts; validated real-time message delivery and system reliability using Jest testing.

EXPENCIFY | FLUTTER · QWEN · SQLITE · BLOC | [[Github](#) →]

- Engineered an offline finance tracker using Flutter and SQLite, with background broadcast hooks to instantly intercept and parse incoming transaction SMS notifications.
- Embedded an on-device local LLM (Qwen) for secure expense categorization, and implemented local biometric vault locking to guarantee 100% user data privacy.

TECHNICAL SKILLS

Languages: Python · JavaScript · Dart · SQL · HTML5 · CSS3

Frameworks: Node.js · React · Express · Socket.io · Flutter · BLoC · Redux

Databases: MongoDB · SQLite · Redis · RabbitMQ · Firebase

DevOps & Tools: AWS · Docker · Git · GitHub Actions · Jest · Nginx · Postman

Specialties: REST APIs · WebSockets · JWT · Razorpay · UI/UX (Figma)

EDUCATION

COLLEGE OF ENGINEERING CHENGANNUR

B.Tech in Computer Science & Eng.
2022 – 2026 | Kerala, India

- **CGPA:** 8.3 / 10.00 (Distinction)

ACCOMPLISHMENTS

OPEN SOURCE CONTRIBUTIONS

- Contributed Flutter/Dart unit tests to Palisadoes Foundation's **talawa** mobile app (300+ stars), improving overall test coverage. [[Contributions](#) ↗]
- Contributed functionality corrections and opened validated tracking issues for **CCExtractor's** Flutter alarm clock app (109+ stars). [[Contributions](#) ↗]

VOLUNTEERING

GDG ON CAMPUS : Organized multiple technical workshops, curated developer learning paths, and directed a highly successful 8-hour campus hackathon with 100+ attendees. Interfaced with Google Developer Experts to host specialized sessions.

PRODDC : Mentored junior developers on client-side state management workflows and promoted clean frontend architecture best practices through collaborative code reviews.

VCEC : Developed the frontend mobile application using Flutter to streamline event communication, broadcast notices, and manage forum activities.

LANGUAGES

English – Professional Proficiency

Malayalam – Native Fluency

Hindi – Basic Conversational
